Did you know that an estimated 60-70% of patient care decisions are based on lab tests?

LAB TESTS ONLINE
Your Trusted Guide

Understand your tests. Empower your health.

Visit Lab Tests Online to learn about lab tests that help screen for, diagnose, and manage different types of cancer.

STANDARD TESTS
- Find out how a common test, the CBC, can help spot blood cancers
- Learn about bone marrow biopsies and their use in diagnosis

SPECIALIZED TESTS
- Learn about tumor markers, genetic mutation tests, and monitoring tests
- Read about tests that guide cancer therapies

CANCER RESOURCES
- Find out more about 15+ different cancers and related lab tests
- Access patient resources and personal stories
